Education

UPES Dehradun, India Aug 2022 - July 2026 Bachelors of Technology in CSE – CCVT CGPA: 7.59/10.0 **KLG Public School Saharanpur, India** March 2021 - May 2022 CBSE Higher Secondary Certificate Percentage: 68/100.0 **KLG Public School** March 2018 – Feb 2019 CBSE Secondary School Certificate Percentage: 89/100.0 **Internship**

Social Intern June 2023-July 2023 **Humanity Welfare Society**, India

- Did social service such as Kanwar Sewa, served as an invigilator in school, and conducted a survey on climate change.

Projects

College Website Development

Technologies Used: HTML, CSS, JavaScript, Bootstrap

Description:

- Designed and developed a responsive college website with a user-friendly interface.
- Implemented features such as homepage, department details, faculty profiles, admission process, and contact form.
- Used HTML5 and CSS3 for page structure and styling, ensuring cross-browser compatibility.
- Enhanced user experience with interactive elements using JavaScript and Bootstrap components.
- Focused on responsive design, improving usability on both desktop and mobile devices

Intel-Image Classification [Project](#)

- Developed a CNN-based image classification model to categorize images into six classes with 85% accuracy on test data and 84% on training data.
 - Enhanced model reliability by implementing data augmentation and dropout, reducing overfitting by 20%.
 - Deployed the model on a web app using Streamlit, enabling real-time classification for immediate feedback.
- Tech Stack: **Python, TensorFlow, Keras, OpenCV, Streamlit, NumPy, Pandas**

Maze Generator using Java

Technologies Used: Java, Java Swing (or JavaFX), Algorithms (DFS, Prim's, Kruskal's)

Description:

- Developed a maze generator application using Java and maze generation algorithms like Depth-First Search (DFS) and Prim's Algorithm.

- Implemented a graphical user interface (GUI) for visualizing the maze generation process.
- Provided customization options for maze size and complexity.
- Ensured efficient backtracking and random path generation to create unique mazes every time.
- Focused on optimizing algorithm performance for faster maze generation.

Skills

Programming languages: C++, Python, JavaScript, Java **Web Technologies:** HTML, CSS, JS and AngularJS
Soft Skills: Communication, Leadership and Teamwork **Miscellaneous:** MySQL, Git, GitHub, Cloud Computing Skills

Technical Certifications

- AWS Cloud Practitioner Essentials
- AWS Skill Builder Learner Guide
- **AWS Academy Introduction to Cloud: Semester 2 [68549]**
- AWS Academy Cloud Architecting [68551]
